

Revenue vs. Cost Model — Global Expansion Edition

Free platform · B2B sponsored questions · aggregate data licensing · multilingual expansion

Language expansion roadmap

phase	language(s)	target users	i18n cost	revenue multiplier	notes
Launch	English	~600M	\$0	1.0x (baseline)	Full support from day one. Build with i18next from the start.
Phase 2 (50K users)	Spanish Portuguese	+540M	~\$6K init +\$100/mo	1.8x revenue 1.3x B2B	Brazil is one of the most engaged social media markets globally. Latin America growing fast.
Phase 3 (250K users)	French Arabic Hindi	+695M	~\$15K init +\$450/mo	3.0x revenue 2.8x B2B	Arabic requires RTL layout (~\$5K one-time engineering). Francophone Africa fastest-growing internet population.
Total potential (all 6 languages)	EN + ES + PT + FR + AR + HI	~2.1B	~\$25K init +\$600/mo	3.0x+ revenue	At 1M+ users across all languages, data licensing becomes a genuinely global polling platform.

English-only vs. global: revenue comparison at key milestones

Assumes 10 B2B sponsored questions/year at \$10,000 each as base scenario.

users	infra (EN only)	revenue (EN only)	infra (3 langs)	revenue (3 langs)	infra (6 langs)	revenue (6 langs)
10,000	\$10K	\$58K	\$16K	\$94K	\$28K	\$164K
50,000	\$35K	\$110K	\$43K	\$182K	\$59K	\$314K
100,000	\$97K	\$180K	\$105K	\$304K	\$121K	\$520K
250,000	\$207K	\$300K	\$221K	\$520K	\$246K	\$880K

500,000	\$415K	\$500K	\$428K	\$880K	\$454K	\$1.5M
1,000,000	\$415K	\$700K	\$428K	\$1.2M	\$454K	\$2.1M

The i18n investment pays for itself quickly. At 250K users, moving from English-only to 6 languages roughly triples revenue while adding less than 15% to infrastructure costs.

Full scale model — 3-language scenario (EN + ES + PT)

The highest-leverage first expansion: English, Spanish, and Portuguese cover ~1.1 billion internet users.

users	infra / yr	B2B rev	data lic	total rev	net profit/(loss)	cost/user
1,000	\$6K	\$9K	\$0	\$9K	+\$3K	\$6.10
5,000	\$6K	\$9K	\$0	\$9K	+\$3K	\$1.22
10,000	\$16K	\$76K	\$18K	\$94K	+\$78K	\$1.61
25,000	\$16K	\$76K	\$18K	\$94K	+\$78K	\$0.64
50,000	\$43K	\$128K	\$54K	\$182K	+\$138K	\$0.87
100,000	\$105K	\$160K	\$144K	\$304K	+\$198K	\$1.05
250,000	\$221K	\$160K	\$360K	\$520K	+\$298K	\$0.88
500,000	\$428K	\$160K	\$720K	\$880K	+\$451K	\$0.86
750,000	\$428K	\$160K	\$1.1M	\$1.2M	+\$811K	\$0.57
1,000,000	\$428K	\$160K	\$1.1M	\$1.2M	+\$811K	\$0.43

i18n technical cost breakdown

item	one-time cost	ongoing cost	notes
i18next setup (React)	~\$500	\$0	Standard React i18n library, minimal setup if built in from day one
Translation — ES	~\$1,500	~\$200/mo	Human translator for new questions + UI updates. AI pre-translation + human review.

Translation — PT	~\$1,500	~\$200/mo	Similar to Spanish. Can share some infrastructure.
Translation — FR	~\$1,500	~\$150/mo	Lower volume initially as Phase 3 expansion.
RTL layout (AR)	~\$5,000	~\$100/mo	Right-to-left UI requires engineering work. One-time cost, then minimal upkeep.
Translation — AR + HI	~\$3,000	~\$300/mo	Two languages, Phase 3 expansion.
Regional moderators	\$0	~\$500–2K/mo	Volunteer or paid community moderators for each language region.
Total (all 6 langs)	~\$13,000	~\$950–2.7K/mo	Spread across 3 phases — not all at once.

Key insight: using AI (Anthropic API) for initial translation drafts with human review reduces ongoing translation costs by ~60% vs. fully human translation.

Global B2B market opportunity

A multilingual verified polling platform opens entirely new buyer categories.

buyer type	languages needed	estimated price / question	example use case
US market research firm	English only	\$5K–\$15K	Consumer sentiment on US products and policies
Latin American brand	ES + PT	\$8K–\$20K	Regional product launch sentiment across LATAM
Global NGO / think tank	3–6 languages	\$20K–\$80K	Cross-cultural opinion on climate, health, democracy
Multinational corporation	All 6 languages	\$50K–\$150K	Global brand perception and consumer attitudes
Government / policy body	Regional	\$30K–\$200K	Public opinion polling replacing traditional survey panels
